Objective

Passionate MERN STACK DEVELOPER with expertise in **React.js**, MongoDB, Express.js, and Node.js. Proven ability to deliver scalable and user-centric web applications. Collaborative team player with a keen eye for design and a commitment to staying at the forefront of technology trends. Excited to contribute my skills and creativity to your team's success.

SKILLS

Language: JavaScript, TypeScript

Front-End: React JS, Firebase, Next JS, Tailwind, Daisy UI, Material UI, Bootstrap, Aceternity UI-

Back-End: Express, MongoDB, Node.js, JWT, RESTful APIs, Mongoose.

Tools: Git and GitHub, npm/yarn, Postman, Visual Studio Code, Figma, Vercel, Surge.

Projects

<u>VirtualDoc (team Project)</u> Your Personal Health Center

|| Live Link

||Client Code

01/2024 - 03/2024

||Server Code

Technology: Front-end React uses Tailwind, Material UI and Firebase for authentication and backend Node.js uses MongoDB, Express and JWT for user validation.

Feature: 1. In order for the user to be able to make an appointment with the doctor, he must first fix the problem. Then the doctor will fix it and pay and then the doctor will give a video call and link.

- **2**.Users can make an appointment with the doctor and go live with the doctor to know about their problem. Then the doctor will see his problem and give medicine.
- **3.**You can download and paint the prescription given by the doctor. And you can see how much money you are using by going to your profile.

Food Management Systems

Meals Manage || Live Link

| Client Code

|| Server Code

Technology: Front-end React uses Tailwind, Daisy UI, Material UI and Firebase for authentication and back-end Node.js uses MongoDB, Express and JWT for user validation.

Feature: 1. Admin root and user root come separately. Now customers can pay through card.

2.Meals Add Update Delete and Meals Request can be given here. Users can purchase memberships. You can give reviews and watch.

Job Search System

Job Search || Live Link

| Client Code

Server Code

Technology: Front-end React uses Tailwind, Daisy UI and Firebase for authentication and back-end uses Node.js MongoDB, Express and JWT.

Feature: After login, the user can apply for the job, if the date is over, he will not be able to apply. Users can see examples in their resumes.

Education

Rangpur Polytechnic Institute Rangpur,

Rangpur, Bangladesh

Group: Computer Science

Result: 8th Semester

08/2020 - Present

HOBBIES AND INTEREST

Full Stack Web Development

Full stack technology refers to the entire depth of a computer system application, and full stack developers straddle two separate web development domains: the front end and the back end. The front end includes everything that a client, or site viewer, can see and interact with.
